DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Publication Infrared Technology and Applications, Non-cryogenic quantum detection in the mid IR using InAsSb photovoltaic structures, Rakovska et al.

- Referring to claim 1, a semiconductor photocathode emitting electrons response incidence of infrared radiation, comprising: a semiconductor substrate made of GaSb, (Page 538 Figure 1 GaSb n-type and p-type); a light absorbing layer made of InAs (1-x) Sbx, (Page 538 Figure 1 #1), where, 0<x<1; and a first compound semiconductor layer, (Page 538 Figure 1 the barrier layer of #2), having wider energy band gap than that said light absorbing layer, (Page 538 Figure 1 #1), said first compound semiconductor layer including A1, (Page 538 Figure 1 the barrier layer of #2), wherein said first compound semiconductor layer, (Page 538 Figure 1 the barrier layer of #2), is formed between said semiconductor substrate, (Page 538 Figure 1 GaSb n-type and p-type), and light absorbing layer, (Page 538 Figure 1 GaSb #1).
- 2. Referring to claim 2, a semiconductor photocathode, comprises a second compound semiconductor layer, (Page 538 Figure 1 the finishing layer of #2), provided so as to sandwich said light absorbing layer, (Page 538 Figure 1 GaSb #1), together with said first compound semiconductor layer, (Page 538 Figure 1 the barrier layer of #2).

Allowable Subject Matter

Page 3

3. Claims 3-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Victor A. Mandala Jr. whose telephone number is (571) 272-1918. The examiner can normally be reached on Monday through Thursday from 8am till 6pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan J. Flynn can be reached on (571) 272-1915. The fax phone number for the reached or (571) 272-1915. The fax phone number for the reached or (571) 272-1915. The fax phone number for the reached or (571) 272-1915. The fax phone number for the reached or (571) 272-1915. The fax phone number for the reached or (571) 272-1915. The fax phone number for the reached or (571) 272-1915.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
